ISOON LAOHASOOT
SOFTWARE DEVELOPER

Software Developer with 3 years of experience and 1 years for part time Software Developer, I love programming becuase it's exciting and challenge for myself, for now I interest to improve my programming skill with Node.js and Graphql

PART TIME DEVELOPER AT FIVELOOP

2014

I was working as a part time developer for fiveloop company with a php, codeigniter, sql. FIVELOOP is a start up to help programmer find a job and help company to find a good programmer and At that time I help FIVELOOP to create a joblist website for programmer.

JUNIOR SOFTWARE DEVELOPER AT FIVELOOP

2015 - 2017

I decide to work at fiveloop becuase I think I like a startup culture and I can decide every thing about technology for create a software in this company, At this time I start the project called "Cerebro", it idea was scraping all programmer data from job list web or social media like a linkedin, github and then I collect it in our database for searching about job candidate, this software help my company to send a potential candidate to other company.

SENIOR SOFTWARE DEVELOPER AT FIVELOOP

2018-2019

I use Node.js, React, MariaDB to make a software for my company called "Wisible", that is a sales automation software for team sales or anyone who need to track sales process and manage sales work flow like a salesforce but easy to use and easy to customize. and This is the most proundly project becuase I choose tech stack called Appollo (Graphql) , at that time I lernining about this stack from zero. I expect it help my work to easier than older project and it was expect

SENIOR SOFTWARE DEVELOPER AT ATVANTAGE

2019-2020

I use Node.js, React lambda, dynamodb to build a platform called "FULLOOP". Actual they have a old platform but It too old. They need me to build a new one follow the old project. The feature is the same as a old one but tech stack is new technology (React, Node, dynamo). That project is a platform for suvey and report. For this job I have lerned a lot about AWS Stack (EC2, Memcached, Lambda, DynamoDB, CloudFront, CloudFormation, CloudWatch) and lerned about ElasticSearch Kibana also
